PROFESSIONAL SUMMARY

Final-year Computer Science student with a strong foundation in software development, system design, and cybersecurity. Experienced in building practical web applications, including a secure budget tracking system (SafeSpend) with authentication and secure coding practices.

Skilled in full-stack development using PHP, JavaScript, and MySQL, with additional knowledge in software architecture, information security, and real-time systems. Previous internship experience at UNOPS Myanmar strengthened analytical, documentation, and communication skills in a professional environment.

Actively seeking opportunities as a Junior Software Engineer, Software Intern, or Cybersecurity/SOC Analyst.

SKILLS

Programming

Python, JavaScript, PHP,, Java, C#, C++

Web Development

HTML, CSS, Bootstrap, Responsive Design, Front End Development

Backend & Database

MYSQL, SQL, Database Design, CRUD Operations, Server-side Deployment
